PHILIPS TECHNICAL REVIEW

VOLUME VI

1941

PHILIPS RESEARCH LABORATORY - EINDHOVEN

52
B 1226 C10

CONTENTS

VOLUME VI - 1941

LIGHT SOURCES

	Page
Aerodrome Illumination by Means of Water-cooled Mercury Lamps	33
Tubular Luminescence Lamps for General Illumination	65
Incandescent Filament Lamps for Series-connection	105
Mercury Lamps for Use in Making Heliographic Prints	250
Lamps for use in Photography	259
The Flickering of Sources of Electric Light	295
Improvements in the Light Yield of Electric Lamps	334

RADIATION AND ILLUMINATION

	Page
Temperature Measurements with the Optical Pyrometer in the Hardening Department	30
Aerodrome Illumination by Means of Water-cooled Mercury Lamps	33
Tubular Luminescence Lamps for General Illumination	65
The Calculation of Lighting Installations with Linear Sources of Light	147
The Concept of Brightness in Connection with Blackout Problems	161
An Apparatus for Treatment with Infrared Radiation	202
Lamps for Use in Photography	259
The Flickering of Sources of Electric Light	295
Luminescent Substances	349

RADIO AND TELEVISION

	Page
The new Broadcasting Transmitters in the Netherlands	1
A Telephone Installation with ultrashort Waves for the Tropics	120
The Causes of Voltage and Current Fluctuations	129
A Simple High-frequency Oscillator for the Testing of Radio Receiving Sets	154
The Noise in Receiving Sets at very high Frequencies	178
Judging an Amplifier by Means of the Transient Characteristic	193
A Discharge Phenomenon in large Transmitter Valves	208
Resonance Circuits for very high Frequencies	217
Lecher Systems	240
Several Technical Problems in the Development of a new Series of Transmitter Valves	253
A Simple System of Band Spread in Shortwave Reception	265
The Diode as a Frequency Changing Valve especially with Decimetre Waves	285
The Sensitivity of Aerials to Local Interferences	302
Technical Problems in the Construction of Radio Valves	317
On the Construction of Vibrators for Radio Sets	342

SOUND AND ITS AMPLIFICATION

	Page
Stereophonic Recording on Philips-Miller Film	80
Non-linear Distortion of Sound Film with Oblique Light Slit	110
New Principles of Construction for the Electro-acoustic Installation of Studios	139
An Apparatus for the Investigation of Sharpness of Hearing (Audiometer)	234
Some Particulars of Directional Hearing	359

TELEPHONY

	Page
A Rectifier for Small Telephone Exchanges	39
Switchboard wire for Telephone Installations	85
A Telephone Installation on ultra short Waves for the Tropies	120
Carrier-wave Telephony	324

CATHODE RAYS

	Page
The Recording of Diagrams with the Electrical Pressure Indication	22
Investigation of the Stresses on Parts of Diesel Engines with the help of the Cathode Ray Oscillograph	94

X-RAYS

A Universal Apparatus for X-ray Diagnosis	12
Small Apparatus for Medical X-ray Examination	225
The Maximum Electrical Field Strength for several Simple Electrode Configurations	270
Hard Glass X-ray Tubes in Oil	309

ELECTROTECHNICAL APPARATUS AND METHODS

The Recording of Diagrams with the Electrical Pressure Indicator	22
A Rectifier for small Telephone Exchanges	39
An Apparatus for the Transmutation of Atomic Nuclei	46
A Direct Current Supply Apparatus with Stabilised Voltage	54
The Control of Contact Pressures	61
Investigation of the Stresses on Parts of a Diesel Engine with the Help of the Cathode Ray Oscillograph	94
A simple High-Frequency Oscillator for the Testing of Radio Receiving Sets	154
A Method of Measuring in the Investigation of Bicycle Dynamos	215
The Maximum Electrical Field Strength for several simple Electrode Configurations	270

MATERIALS AND THEIR RESEARCH

New Kinds of Steel of high Magnetic Power	3
Temperature Measurements with the optical Pyrometer in the hardening Department	30
Switchboard wire for Telephone Installations	85
The Mechanical Properties of welded Joints	97
Experiments on the Austempering of Steel	279
Luminescent Substances	349
The Permeability of Metall Walls for Gases	365
The Determination of the Elastic Contants of Metalls	372

MISCELLANEOUS

An Apparatus for the Transmutation of Atomic Nuclei	46
The control of Contact Pressures	61
A Simple Apparatus for Counting Electrons	75
Switchboard Wire for Telephone Installations	85
The Mechanical Properties of Welded Joints	97
Magnetic Oil Filters	169
A Method for the Control of Colour Deviations	186
An Apparatus for Treatment with Infrared Radiation	202
Luminescent Substances	349
The Permeability of Metal Walls for Gases	365
